

Average Starch and Sugar Content of Common Feeds

(Starch and Sugar values of forages should always be obtained from actual laboratory analysis. It is also recommended that the values below be used only as indications of the levels of Starch and Sugar that can be expected in the feeds listed. Actual values from a current laboratory analysis are always preferred.)

Name	%DM Starch	%DM Sugar
Almond hulls	7.40	33.30
Barley, rolled	59.70	2.50
Beet pulp dehydrated	0.00	20.10
Canola meal, expeller	4.00	10.00
Canola meal, solvent	0.50	10.00
Citrus pulp dehydrated	1.50	24.00
Corn distillers with solubles	6.00	2.80
Corn gluten feed	18.00	0.00
Corn grain, ground	70.00	1.10
Hominy feed	49.90	4.30
Rice bran	22.00	4.50
Soybean meal, 44% solvent	6.00	10.00
Soybean meal, 48% solvent	6.00	11.00
Soybean meal, expeller	2.00	9.00
Soybeans, whole raw	1.00	6.40
Soybeans, whole roasted	1.30	8.30
Wheat bran	14.00	6.00
Whey, fresh	0.00	62.50
